RE: SECTION 08520 - ALUMINUM WINDOWS

Dear Mr. Hellring:

The Division of Facilities Planning and Standards and various departments within M-DCPS have reviewed the Impact Resistant Series 5500 Double Hung Louvered Window by Superior Window Corporation and concluded it complies with M-DCPS Design Criteria and Master Specification Guidelines. This product may be used in our facilities when complying with the specifications of the M-DCPS commissioned architects and engineers, M-DCPS Design Standards, and applicable codes.

Since M-DCPS Design Criteria and Master Specification Guidelines are periodically updated, you may wish to contact the project architects and engineers commissioned by the Miami-Dade County School Board, regarding the product's possible use in their individual projects.

Sincerely,

Thomas P. Achacoso, R.A., Coordinator
Division of Facilities Planning & Standards
